***Allowable Subject Matter***

1. Applicant's arguments to the 102 and 103 rejections are deemed to overcome the outstanding office action.
2. Claims 1-20 are allowable.

The following is an examiner's statement of reasons for allowance:

The prior art does not teach or suggest the operating handle attachment for use with an electrical switching apparatus interface assembly including an operating handle, an actuator disposed remote from the operating handle, and a connector therebetween, the operating handle attachment comprising:

- Claim 1: the interfacing segment structured to receive the connector, in order to link the operating handle to the actuator, the interfacing segment being integral with the handle-engaging segment in order that the operating handle attachment is a single-piece.

- Claim 4: the handle-receiving aperture is a pair of opposing apertures, and at least one projection is a plurality of serrations disposed on one of the apertures.

- Claims 15 and 18: the interfacing segment receiving the second portion of the rigid connector, in order to link the operating handle of the first electrical switching apparatus to the second independently pivotable switching apparatus.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
